Why TGL Vintage LED is chosen by top clients

- TGL Vintage line uses LED filaments which maintain aesthetics and deliver warm vintage style lighting.
- Vintage line uses TGL's latest design of LED Filaments which delivers 50% more savings vs other LED.
- Unique mini IC circuit design requires no base so TGL Vintage LED looks like an incandescent lamp
- High compatibility with advanced dimming systems for smooth dimming performance.
- Provide even lighting within fixtures and sconces leaving no dark spots.
- Energy Savings of over 90% vs Incandescent bulb and over 65% vs. CFL equivalent.
- Environmentally friendly, contains no mercury and lasts 5 times longer than Incandescent bulbs.
