Maximize Energy Savings

- World Class High Efficiency LED Chips integrated with *AC Direct™* results in one of the **MOST ENERGY EFFICIENT LED tubes** on the market today.
- Energy Savings of over 60% versus T8 Fluorescent lamps provides paybacks under 1yr in 7/24 areas

Commercial Grade Design for Safety & Reliability

- AC-Direct™* technology allows Direct Replacement into T8 / T5 Fixtures at 120V to 347V.
- No electrical wiring needed, works with existing T8 / T5 ballast.
- Industrial Grade **Premium quality construction with Safety Fuse** to protect against overheating.

Dimmable T8 / T5 LED Tubes (select ballasts)

- Works directly with existing dimmable ballasts and dimmers 120V to 347V and dims.
- No electrical wiring needed, works with existing T8 / T5 electronic ballast.
- One of the few direct replacement T8 / T5 LED tubes on the market.
- Great for boardrooms, ballrooms and convention centres.

Easy LED Upgrade Underground Parking

Quick cost effective LED retrofit with no electrical work needed.

- Raise light levels
- Improve Colour visibility
- Great for security cameras
- Works Perfectly in Cold weather
- Vibration Proof
- No bulb changes 5yrs Guaranteed
- Energy & Maintenance Savings

Amazing Energy Savings and paybacks (Offices)

Improve aesthetics while saving energy and reducing maintenance costs.

- No Pulsing
- No Flickering
- Reduce Eye Strain
- Sharpen colour visibility
- Save over 60% vs T8 Fluorescent
- Great paybacks
